

Action Target Becomes an NSSF Voting Member

Provo, UT – Action Target is proud to announce its recent acceptance as a voting member of the National Shooting Sports Foundation (NSSF).

Action Target was founded with humble beginnings over 25 years ago by two high school friends in their garage. Since 1985, Action Target has grown to become the world's largest shooting range equipment manufacturer. Holding more than 40 patents, Action Target has steadily increased its inventory to include over 4,000 products. In addition to manufacturing, Action Target also designs, delivers, and installs indoor and outdoor range equipment throughout the world. Action Target is the preferred choice for the firearms training programs of US & international commercial/sport shooters, law enforcement, military, Special Forces groups, and tactical training schools.

Action Target is honored to be accepted as a voting member by the NSSF's Board of Directors and pledges to assist in the NSSF's ongoing mission to promote, protect, and preserve both the shooting industry and its heritage. As private ownership of firearms increases, the need for safe facilities to practice shooting has become crucial. Action Target and the NSSF will work together to enhance the presence of commercial shooting ranges in the USA while supporting the many programs they offer.

For more information about Action Target's full line of products and services visit their website, www.actiontarget.com. To purchase Action Target products for drop shipment direct to your U.S. range or facility, shop online at www.shopactiontarget.com. For other range-related needs, visit their subsidiary, [Law Enforcement Targets](#).
