

PT POPPERS™

- Reactive knock-down action
- Through hardened AR500 steel (550 available)
- Multiple shapes & sizes
- Adjustable pitch angle
- Reversible target plate
- Fall forward option

PT Poppers™ are simple knockdown targets designed for long life and reliability. They are so effective because the clanging steel and the falling plate immediately reinforce successful shots. You can also adjust the pitch angle of the target to require multiple hits or compensate for ammunition power. You can also incorporate our innovative fall-forward option to avoid launching rounds over the backstop during multiple shot drills.

The shooting surface of our PT Poppers™ can be easily reversed to allow shooting on both the front and back surfaces. Rotating the target like this not only extends its life, but also protects your equipment investment.

It is extremely important to note that rotating the shooting surface is a preventative measure only! Never rotate any target that is already damaged or bowed in any way.

PT PEPPER POPPER

Size: 42" H x 28" L x 13" W
 Weight: 55 lbs. / 68 lbs.

PT PEPPER POPPER 2/3
