

PT HOSTAGE™

- Reactive swing-around action
- Through hardened AR500 steel (550 available)
- Low profile, bullet shedding stand
- Great stress inducer
- Builds realistic expectations
- Ideal for tactical training scenarios

The only thing worse than missing what you shoot at is hitting something you were not supposed to. The PT Hostage™ is a simple but powerful reactive steel tool that simulates a hostile threat hiding behind an innocent bystander. To provide instant and obvious feedback to the shooter, the target plate will swing over to the opposite shoulder each time it is hit.

If deadly force is warranted based on the situation, an officer may be forced to adjust his tactics and make the shot. The results of that shot in a training environment can help the officer understand what actions may or may not be realistic with regards to marksmanship under stress.

Size: Base: 3" H x 24" L x 24" W
 Stand: 1, 2, 3 or 4 feet high
 Head: 24 x 13 inch torso plus paddle
