

# PORTABLE TARGETS

## PT SWINGER™

- Lateral swinging action
- Smooth motion
- Low profile, bullet shedding stand
- Multiple trigger options
- Stable platform
- Ideal for tactical training scenarios

The PT Swinger™ lets you economically incorporate moving targets into your training program. It provides side-to-side motion that simulates a dodging suspect or a suspect hiding behind cover.

The counter-balance mechanism provides smooth motion with just a simple pull on the attached cord, or you can increase the challenge by rigging a PT Swinger™ to activate by knocking down a PT Popper™.

For greater efficiency and less mess, the new target holder option eliminates the need for wood and staples to hold the target.

Size: Base: 24" L x 24" W  
Stand: 2, 3 or 4 feet high  
Head: Cardboard target

Weight: 50 lbs.

Handgun: Cardboard target

Rifle: Cardboard target
