

# RANGE PRODUCT OVERVIEW

# ACTION TARGET ADVANTAGE

At Action Target each step of the shooting range build process is handled by in-house professionals with years of expertise and industry knowledge. From manufacturing, to the initial range designs, to product development, everything is done on-site at our Provo, Utah facility. No matter your shooting range needs, Action Target provides solutions to keep you better prepared for whatever lies ahead.

**CONSULT:** Action Target's knowledgeable range consultants are there to guide you through each step of the process.

**INSTALL:** Our experienced and certified install teams work quickly and efficiently to make your range operational.

**DESIGN:** No two shooting ranges are the same. The Range Design and Drafting team will turn your ideas into drawings and a range that fits your needs.

**SERVICE:** The story doesn't end when your range opens. Action Target's customer service team is there to keep your range in top condition.

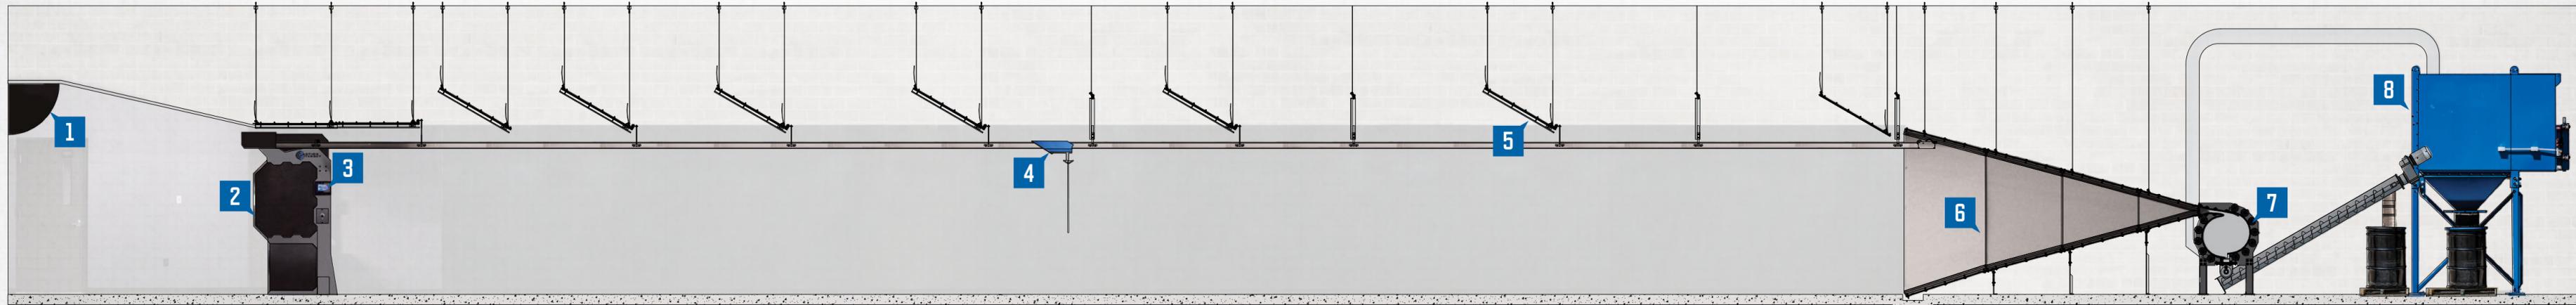

**ENGINEER & MANUFACTURE:** Our team ensures products are compliant with engineering standards. These products are manufactured in our 125,000 square foot facility.

**SUPPLY AND MAINTAIN:** Through our subsidiary, Law Enforcement Targets, Action Target provides everything to keep your range running with our range supply and maintenance programs.

# COMPLETE RANGE SOLUTIONS

## 1 VENTILATION

Ventilation in a shooting range is an essential and vital component of the overall range design. Proper ventilation provides a safe atmosphere and improves the shooter's experience. Action Target's industry leading air delivery and purification systems provide complete range ventilation, including a unique, ceiling mounted, 180 degree air delivery systems that meet OSHA, EPA, and NIOSH regulations.

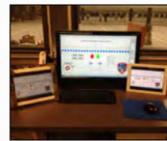

## 2 DEFENDER™ SHOOTING STALLS

Action Target's Defender™ Shooting Stalls are the safest and most modifiable shooting stalls available. Independent ballistic testing and advanced designs ensure the shooter stays safe and comfortable in your range. Attachable accessories, interchangeable ballistic panels, and multiple table configurations work together to create the ideal shooting experience for your customers.

## 3 RANGE CONTROL SYSTEMS

Whether it's the target systems, the lighting, or training scenarios, range control systems enhance ease of use and functionality for the range owner and customer. Action Target offers a variety of control systems that can be customized to fit any range scenario.

### INDIVIDUAL LANE CONTROL

Key pads installed inside individual stalls provide the opportunity for shooters to control their target. These systems vary between simple toggle switches to touch screens that offer advanced functionality such as customizable training scenarios, lighting modes, and preprogrammed drills.

### MASTER RANGE CONTROL

Master control software systems provide range control for the range master. These systems can provide simple lane control or create training sequences. With the ability to build and save programs, range masters and firearms trainers are able to build effective training programs and scenarios.

### WIRELESS RANGE CONTROL

Action Target offers a number of wireless systems to provide range control from anywhere in the range.

- Air Command
- Mancom Control Switch
- Mancom Wireless Cart

## 4 TARGET SYSTEMS

Action Target revolutionized the reactive and turning target concepts when we introduced air powered, individually controlled target systems. This innovation expanded into target retrievers, and running targets. Across commercial, law enforcement, and military markets we have the target system to meet your needs.

### TURNING TARGETS

Pneumatic and electric turning target systems are both available with a variety of features depending on range usage and training purposes.

- Mancom Fixed Turning Target Stand
- D-TaPS
- Mancom Fixed Lateral
- Power-90
- Tandem-90

### RUNNING TARGETS

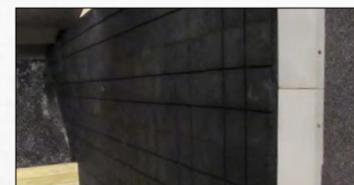

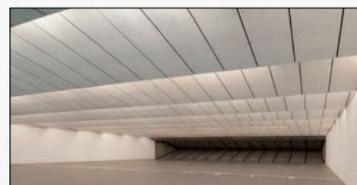

Horizontally running targets add another dimension of training to a range. Used in conjunction with turning targets, they simulate real-world situations.

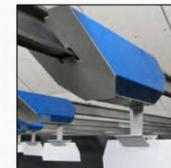

- Mancom Dual Running Man
- Track Runner

## 5 BAFFLES & DEFLECTORS

Action Target offers a number of different baffle and deflector configurations, for both tactical and fixed position firing to protect overhead lights, pipes, ventilation ducts, and most importantly, to safely deflect errant shots.

### TARGET RETRIEVERS

Target retrievers are essential for providing shooters control of their own experience. Action Target's line of retrievers has varying features to accommodate any need:

- SRET
- Mancom Touch N' Go
- Mancom Touch Plus
- Mancom AWD

### REACTIVE STEEL TARGETS

Reactive steel targets are an ideal training tool because shot accuracy is immediately identified from any distance. Action Target's reactive targets enhance any training program.

- Bobber
- Bobber XTreme
- Steel KD

## 6 BULLET TRAPS

Action Target understands the science of bullet containment. With over 20 years experience in trap design and construction, we are the industry leader in lead collection and containment. Our steel and rubber traps are built for safety, reliability, and durability.

### RUBBER BERM TRAP

Action Target's Rubber Berm Trap works with standard pistol, shotgun slug, and rifle rounds up to .50 BMG (tracer and other incendiary rounds not recommended). The trap allows for tactical close-range and cross-lane shooting. The trap is ASTM E108-11 compliant, the best fire treatment rating on the market.

### TOTAL CONTAINMENT TRAP™

The Total Containment Trap™ is the industry standard for steel traps. Patented in 1994, this trap uses angled steel plates that break up bullets and funnel the splatter into a chamber where they are decelerated and collected for recycling. The trap is constructed from AR550 steel and safely handles pistol and rifle rounds. The Total Containment Trap™ also allows for tactical close-range and cross-lane shooting.

## 7 DECELERATION AND LEAD CONTAINMENT

The Total Containment Trap™ offers two ways of collecting spent lead that can then be safely recycled. The Screw Conveyor System moves lead using an auger system until it is collected in a barrel. When the barrel is ready to be recycled it simply needs to be capped and picked up by the recycler. This method minimizes the contact with lead. The other method uses canisters which need to be emptied periodically into a larger barrel which can then be picked up and recycled.

## 8 LEAD DUST COLLECTION UNIT

A dust collection unit is the last piece to making your shooting range safe for your shooters, and compliant with clean air regulations. Our units utilize negative pressure to vacuum up lead dust that exists in the range. The lead is collected for recycling.

# OTHER PRODUCTS & SERVICES

## MATCH™ SHOOT HOUSE

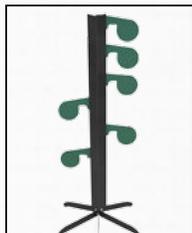

MATCH™ (Modular Armored Training Combat House) set the standard for live fire shoot houses. With a number of available configurations, accessories (including hiding spaces, breach doors, and after action review), and safe bullet containment, MATCH™ provides the best in real world training for both law enforcement and military.

## PORTABLE STEEL TARGETS

Action Target has been manufacturing portable steel targets for over 20 years. We make the safest and best portable steel targets available.

See the full line of Action Target portable steel targets at [LETargets.com](http://LETargets.com)

## TRAINING COURSES

Building and running a range can be intimidating. Action Target is dedicated to simplifying this process by providing training opportunities for both law enforcement and commercial range owners. Details and registration for these training courses can be found at [ActionTarget.com/shooting-academy](http://ActionTarget.com/shooting-academy)

### LETC (Law Enforcement Training Camp)

LETC is a training camp for agency firearm trainers. Action Target partners with some of the best training agencies in the country, including Glock, Spartan, and Hoffner's, to provide the latest in tactical training.

### Range Development and Design Seminar

These seminars are geared towards making sense of the range building process. Learn from experts in planning, development, equipping, and building your shooting range. Seminars take place at various locations throughout the year.

## RANGE MAINTENANCE & SUPPLIES

Action Target offers Range Maintenance plans for a variety of products and cleaning services. We can provide a complete range maintenance plan, or service a part of the range. Whatever your needs are, we can provide a solution.

We also carry range supplies. Visit [LETargets.com](http://LETargets.com) to view our complete product offering.
